U.S. DEPARTMENT OF AGRICULTURE

Foreign Holdings of U.S. Agricultural Land

Through December 31, 2022

Foreign Holdings of U.S. Agricultural Land through December 31, 2022, by the Farm Service Agency and the Farm Production and Conservation Business Center, U.S. Department of Agriculture.

Abstract

Foreign persons held an interest in over 43.4 million acres of U.S. agricultural land as of December 31, 2022. This is 3.4 percent of all privately held agricultural land and nearly 2 percent of all land in the United States. These and other findings are based on an analysis of reports submitted in compliance with the Agricultural Foreign Investment Disclosure Act of 1978.

Keywords: Agricultural land and foreign land holdings

Summary

Foreign investors held an interest in over 43.4 million acres of U.S. agricultural land (forest land and farm land) as of December 31, 2022. This is an increase of over 3.4 million acres from the December 31, 2021 report and represents 3.4 percent of all privately held agricultural land in the United States. These and other findings are based on information submitted to the U.S. Department of Agriculture in compliance with the Agricultural Foreign Investment Disclosure Act of 1978. Forest land accounted for over 48 percent of all reported foreign-held acreage, cropland for over 28 percent, pasture and other agricultural land for over 21 percent, and non-agricultural land for slightly more than 2 percent. Foreign holdings of U.S. agricultural land increased modestly from 2012 through 2017, increasing an average of 0.6 million per year. Since 2017, foreign holdings have increased an average of nearly 2.9 million acres annually, ranging from 2.4 million acres to over 3.4 million acres per year.

Foreign Holdings of U.S. Agricultural Land Through December 31, 2022

"Impacts of Foreign Acquisitions of U.S. Agricultural Land"

Introduction

Foreign individuals and entities reported holding an interest in over 43.4 million acres of U.S. agricultural land as of December 31, 2022.** This is 3.4 percent of all privately held U.S. agricultural land and nearly 2 percent of all land in the United States (see fig. 1 for State-level detail).

Summary of the Act and Regulations

The Agricultural Foreign Investment Disclosure Act of 1978 (AFIDA),¹ as implemented by the regulations,² requires all foreign persons holding agricultural land as of February 1, 1979, to file a report of such holdings with the Secretary of Agriculture by August 1, 1979. All foreign persons who acquire or transfer an interest in agricultural land thereafter are required to report such transactions within 90 days of the date of acquisition or transfer. In addition, any foreign person who holds land that subsequently becomes or ceases to be agricultural land, or any person who holds agricultural land and subsequently becomes or ceases to be a foreign person, must also file a report within 90 days of such change.

AFIDA specifies in detail the information to be supplied by the foreign person and provides that necessary additional information may be obtained by the Secretary. The information required to be reported consists of the legal name and address of the foreign person; citizenship, if an individual; if not an individual or a government, nature of the legal entity, including the entity's country of creation and principal place of business; type of interest; legal description; acreage; land use; purchase price or any other consideration given; intended use; where applicable, information about the representative of the foreign person; how the interest in the land was transferred; the relationship of the owner to the operator; type of rental agreement, if any; and the date the interest in the land was transferred. In the case of a disposition, the party disposing of the interest is also required to give the legal name and address of the purchaser. Any change in the legal name or address of the foreign person and other entities disclosed on the report form must also be reported within 90 days of such changes. Failure to comply with the AFIDA will subject the foreign person and/or other entities disclosed on the report to a civil penalty of up to 25 percent of the fair market value of the interest held in the land in question.

In accordance with Section 7 of the AFIDA, completed report forms are available for public inspection

* Those listed are all in the Economic and Policy Analysis Division of USDA's Farm Production and Conservation Business Center, Washington, D.C.

** This publication contains data gathered from January 1, 2022 through December 31, 2022.

in Washington, DC, within 10 days of receipt by the Secretary. Section 6 of the Act requires that every 6 months the Secretary transmit to each State copies of completed report forms for foreign-held interests in agricultural land in that State.

Definitions

For this report, the term "holdings" applies to all U.S. agricultural land interests held by foreign investors as of December 31, 2022. This term is used as the title for a subsequent section, which analyzes the reported data.

“Agricultural land” as defined in the Act includes all land in the United States used for forestry production. Land used for forestry production means land exceeding 10 acres in size in which 10 percent is stocked by trees of any size including land that formerly had such tree cover and will be naturally or artificially regenerated. The regulations further define agricultural land as all land used for farming, ranching, or timber production if the tracts are more than 10 acres in size in the aggregate. Land which is currently idle, but last used within the past 5 years for farming, ranching, or timber production, must be reported. Tracts totaling 10 acres or less in the aggregate, and which produce annual gross receipts in excess of \$1,000 from the sale of farm, ranch, forestry or timber products, must also be reported.

AFIDA requires reporting "any interest" in the land other than a security interest (a mortgage or other debt-securing instrument). The regulations exempt leaseholds of less than 10 years' duration, contingent future interests, non-contingent future interests that do not become possessory upon termination of the present estate, non-agricultural easements and rights-of-way, and interests solely in mineral rights.

A "foreign person," as defined in the Act, includes any individual who: (1) is not a citizen or national of the United States, (2) is not a citizen of the Northern Mariana Islands or the Trust Territory of the Pacific Islands, or (3) is not lawfully admitted into the United States for permanent residence. Foreign governments, entities which are created under the laws of, or have their principal place of business in a foreign country, and U.S. entities in which there is a significant foreign interest or substantial control are also defined as foreign persons under the Act. Any person who has been issued the Department of Homeland Security, U.S. Citizenship and Immigration Services “Alien Registration Receipt Card” (green card) is considered lawfully admitted for permanent residence and is exempt from the requirements of the Act.

Individuals are defined as one person or a husband and wife. The "partnership" category includes all legally defined partnerships, joint ventures, and tenancies in common that include two or more persons who are not married. The term partnership does not differentiate between joint tenancies and tenancies in common. In the interest of simplicity and brevity, fine legal distinctions, however important in an individual case, are ignored.

Each foreign entity holding an interest in U.S. agricultural land is required to file a report. Therefore, if two individuals hold an interest in land as a partnership, the partnership is to file one report as a partnership, with the partners' names, addresses, and citizenship listed on the FSA-153 form. Occasionally, however, two people file as individuals, each filing a separate report on the same land with a partial interest of, for example, 49 percent listed on each form. Because it is not always possible to distinguish separate reports for the same land, two such individuals cannot be differentiated from one partnership. This may occur when there is no legal partnership, but individuals hold an interest in the land as tenants in common. If they file together on one form, they are automatically considered a partnership. If they file separately, they are generally considered individuals. Therefore, the data on the number of reported parcels should be used with caution, although there is no double-counting of acres.

The Act is designed to impute foreign person status to certain U.S. entities holding direct and indirect interests in U.S. agricultural land. For purposes of the Act, this is accomplished by defining each successive link in a chain of U.S. entities containing foreign interests as a foreign person.

However, only the foreign person who actually holds the direct (title) interest in the land (that is, the first layer or tier) is considered the reporting entity. This entity need not actually be foreign, but under the Act, is deemed a foreign person because another foreign person holds a significant interest or substantial control in the title owner. In some instances, the second tier also may not actually be foreign, but may be deemed foreign under the Act for the same reason. The regulations define "significant interest or substantial control" to mean a 10-percent or more interest in the entity if held by a single foreign person or a group of foreign persons acting in concert, or a 50-percent or more interest if held by a group of foreign persons not acting in concert, none of whom individually holds a 10-percent or greater interest in that entity. Under the regulations, the reporting entity (other than an individual or government), whether domestic or foreign, is required to provide information (names, addresses, citizenship, and the nature of the entity, if any) on the second-tier investments; that is, all foreign persons holding a significant interest or substantial control in the reporting entity must report. In turn, a second-tier entity may be required to provide information about foreign persons who hold a significant interest or substantial control in that entity.

AFIDA filers must report holdings to the third tier of ownership. Some filers report the ultimate owning country. AFIDA records the holding country at the last tier reported by the filer (usually, the third tier or, in some cases, the ultimate owning country).

When the foreign person is an individual from, or an entity created under the laws of, for example, Germany, the report is processed as "Germany." Where persons from many different countries hold direct and indirect interests in one piece of land, an attempt is made to identify the predominant country as the country of origin. When there is no predominant country, for example, an equal partnership between a Canadian and a German, the report is processed as a multiple foreign owner with no predominant country.

The AFIDA procedures provide for land to be reported by parcels. All land held by the same entity, in the same manner (type of interest), located in one county, and acquired at the same time, is considered a parcel and is to be reported on a single form. Land does not have to be adjacent to be considered part of one parcel. This parcel concept is intended to ease the reporting burden.

All parcels (and acres) for each land holder have been combined under said land holder. Therefore, the number of land holders is less than the number of parcels. However, because land holders do not always report their names exactly the same on each form, it is difficult to precisely associate these forms with one person or legal entity. Some foreign persons hold land in their own names and also hold interests in entities that hold other lands. These entities are treated as separate land holders.

The AFIDA reporting requirements allow foreign persons 90 days to report their transactions to the U.S. Department of Agriculture (USDA), but not all transactions occurring in the 90 days preceding the closing date of the report are reported to USDA by that date. In some situations, reports are filed late and/or may be incomplete. This means that in some cases, the 2022 data, and prior years' data, may be understated and should be regarded as preliminary.

Analysis of Data Reported Under the Act

Holdings

Data in this section are derived from the reports filed by foreign persons who held an interest in U.S. agricultural and non-agricultural land as of December 31, 2022. To simplify the discussion, the data as of December 31, 2022, hereafter are referred to simply as ‘2022’. Foreign-held U.S. agricultural acres as of December 31, 2021 were 40 million. Foreign-held U.S. agricultural acres as of December 31, 2022 were nearly 43.4 million, resulting in an increase of approximately 3.4 million acres (report 1A).

Concentration of Foreign Holdings of U.S. Agricultural Land

Foreign persons have reported acreage holdings in all 50 States and Puerto Rico³ (figures 1 and 2). Except for Maine (described below), only a small percentage of privately held agricultural land in the other 49 States is held by foreign investors (report 1). Maine acreage aside, foreign investment in U.S. agricultural land is concentrated in the South and West.

The state of Texas has the largest amount of foreign-held U.S. agricultural land with over 5.4 million acres (report 1). Maine has the second largest amount of foreign-held agricultural acres, with just under 3.5 million. Colorado has the third largest amount of foreign-held agricultural land with just under 2.5 million acres.

In terms of percentages, approximately 21.1 percent of Maine’s privately held agricultural land is held by foreign investors; this is approximately 8 percent of the reported foreign-held agricultural land in the United States (report 1). Hawaii has the second largest percentage of foreign-held U.S. agricultural land, which is 12.8 percent of the privately held agricultural land in the state, and less than 1 percent of the reported foreign-held agricultural land in the United States. The majority of foreign-held agricultural land in Texas and Maine consists of forest land (report 1C). Alabama (8.6%), Michigan (8.6%), and Louisiana (8.3%) have the next largest percentages of reported foreign-held agricultural land within each of those states.

States showing the largest increases in foreign-held agricultural acres in 2022 were Colorado, with an increase of over 557,000 acres; Alabama with an increase of over 514,000 acres; and Michigan, with an increase of over 461,000 acres (report 1A). Forty-five percent of the overall increase in acreage between 2021 and 2022 is attributed to these three states. These increases mostly reflect large purchases of forest land in Alabama and Michigan while increases in Colorado are mostly cropland and pasture. Arkansas, Illinois, Maine, North Carolina, Ohio, Oregon, and Vermont are the only states showing a decrease in foreign-held agricultural acres; the 302,601-acre combined decline reflects long-term leaseholds which were terminated and the sale of various types of agricultural land. Note that some of the changes reflect reconciliation of past transactions and recording of late filings.

The data reflected in report 1 and report 1A pertain to foreign land holdings of agricultural land and do not include holdings of non-agricultural land. There are nearly 909,000 reported acres of foreign-held non-agricultural land. Reports 1B, 1C and reports 2-9 include the non-agricultural land category.

³ Some states regulate foreign ownership of agricultural land, which may appear inconsistent with AFIDA reported acreage. Note that certain state regulations apply to both long term leases and land purchases, while in other states the restrictions apply only to land purchases. The timing of when state laws were enacted, issues associated with ownership tiers, and other factors may also explain differences.

County concentrations of foreign holdings of agricultural and non-agricultural land within the continental United States are shown in figure 3.

Country of Origin

Canadian investors own the largest amount of reported foreign-held agricultural and non-agricultural land, with 32 percent, or 14.2 million acres (report 1B). Foreign persons from an additional four countries, the Netherlands with 12 percent, Italy with 6 percent, the United Kingdom with 6 percent, and Germany with 5 percent, collectively held 13 million acres or 29 percent of the foreign-held acres in the United States. The remaining 17.1 million acres, or 38 percent of all reported foreign-held agricultural and non-agricultural land, are held by various other countries. For example, China held 349,442 acres, which is slightly less than 1 percent of foreign-held acres.

Chinese Investment in U.S. Agricultural Land⁴

Even though Chinese filings are less than 1 percent of foreign-held agricultural land acres in the U.S., there is considerable interest in this topic. Chinese primary-investor filers reported owning 349,442 acres of agricultural land as of December 31, 2022. Two Chinese-owned companies—Brazos Highland Properties, LP and Murphy Brown LLC (Smithfield Foods)—reported 102,345 acres and 97,975 acres, respectively, and were by far the largest Chinese reporters. Other top Chinese-owned reporters were Murphy Brown of Missouri (Smithfield Foods) (42,716 acres); Harvest Texas, LLC (29,705 acres); and Walton International Group (USA), Inc. (29,437 acres) (Report 10). These five companies accounted for 86 percent of all reported Chinese holdings. There were no filings directly by the government of China.

Chinese investments in U.S. agricultural land are spread across the country (figure 4). The states with the largest Chinese holdings are Texas (162,167 acres); North Carolina (44,776 acres); Missouri (43,071 acres); Utah (32,447 acres); and Virginia (14,382 acres) (Report 11). Together, these five states had 85 percent of Chinese filings associated with U.S. agricultural land. In Texas, in particular, long-term leases associated with wind energy investment predominate, while land ownership tends to be more common in other states.

Several caveats are important. To make tracking of foreign investment tenable, given that thousands of transactions are reported annually, holdings are recorded by primary investor. If investors from multiple countries are listed on the FSA-153 form, and the primary shareholding country cannot be determined, the holding is recorded as “no predominant country.” As a result, the acreage associated with China—or any other country discussed in this report—should be interpreted as a minimum. For example, a Chinese investor which is part of a multi-country investment group, or having a multi-country complex organizational structure, may well fall in the “no predominant country” category. In such cases, China’s interest would be under-represented.

Land Use

Timber or forest land accounted for 48.3 percent of reported foreign interest holdings of U.S. land, followed by cropland, which accounted for 28.3 percent (report 1C). Foreign-held pasture and other agricultural land total 21.3 percent of all foreign interest holdings in the United States.

⁴ The 2021 AFIDA report incorrectly overstated Chinese ownership by roughly 27,000 acres. Harvest Texas acquired Brazos Highlands and while the acquisition for Brazos Highlands was entered in 2021, the disposition by Harvest Texas was not entered until this year.

The non-agricultural land category, which includes homesteads and roads, accounts for 2.1 percent of the reported foreign-held acres in the United States. Land use figures should be used with caution because they reflect only information received at the time of processing and do not account for changes in land use that may have occurred subsequently.

County concentrations of foreign holdings of cropland, pasture land, and forest land within the continental United States are shown in figures 5 through 7.

Trends

Foreign holdings of U.S. agricultural land increased modestly from 2012 through 2017, increasing an average of 0.6 million per year. Since 2017, foreign holdings have increased an average of nearly 2.9 million acres, ranging from 2.4 million acres to 3.4 million acres per year.

All categories increased between 2012 and 2022, led by gains in cropland (figure 8). During this time period, cropland increased 145 percent from roughly 5.1 million to 12.5 million acres, forest land increased 53 percent from roughly 14.0 million to 21.4 million acres, and pasture land increased 27 percent from approximately 5.9 million to over 7.5 million acres. The changes in pasture and cropland are mostly due to foreign-owned wind companies signing, as well as terminating, long-term leases on a large number of acres. The actual amount of land used by a wind farm is relatively low due to the small footprint of the wind turbines and limited use of access roads. This leaves most of the parcel available for agricultural use.

Impacts of Foreign Acquisitions of U.S. Agricultural Land

Intended Land Use

AFIDA filers must report the intended use of acquired land and whether it is intended to be used for non-agricultural purposes. Based on data as of December 31, 2022 (and excluding any portion of each parcel already classified as non-agricultural), 1.9 percent (roughly 807,236 acres) of this land was intended to be used for non-agricultural purposes. The average annual increase of acquisitions intended for non-agricultural purposes between 2012 and 2022 was roughly 16,342 acres, though land acquired for non-agricultural uses increased to 127,875 acres in 2022 and was 6 percent of all foreign-held land (figure 9). While this represents a nearly 4-fold increase from 2021, these 127,875 acres represent roughly 0.01 percent of America's privately held agricultural land. Roughly two-thirds of the land intended for non-agricultural uses acquired in 2022 came from three separate acquisitions, each by a different wind energy developer.

The non-agricultural land use estimate presented here is an upper bound for two reasons. First, upwards of half of the land reported as intended for non-agricultural purposes is likely for renewable energy use by foreign developers who must file an AFIDA report due to their long-term leaseholds. Energy developers typically report the entire acreage of the tract and not the expected footprint of the wind turbines or solar panels (which might be unknown at the time the leasehold is signed). In addition, not all land intended for energy development results in a project being installed. Much of the land, even if turbines or solar panels are installed, continues to remain in an agricultural use (often cropland and pastureland).

Second, roughly 12 percent (89,126 acres) of the 807,236 acres intended for non-agricultural uses was forest land. AFIDA does not require forest land to be in agricultural or timber production to be considered agricultural land, so some of the forest acreage may be remaining in its original state.

The total amount of cropland intended to be used for non-agricultural purposes as of December 31, 2022, was 266,316 acres (32 percent) and the amount of pastureland intended to be used for non-agricultural purposes was 187,465 acres (20 percent) (figure 10). The largest land-use category that was intended to be used for non-agricultural purposes was “other agricultural land” at 264,330 acres, or 36 percent of the total agricultural acres intended to be used for non-agricultural purposes.

Owner-Producer Relationships

Of the 44 million acres of foreign-held U.S. agricultural land as of December 31, 2022, roughly 30 million acres were reported as foreign-owned,⁵ with the remainder falling under some other type of interest (largely 10-year-or-longer leaseholds).⁶ Of this 30 million, 66 percent (by acreage) was owner-operated, 14 percent had a tenant or sharecropper as the producer, and 12 percent reported a manager other than either an owner or a tenant/sharecropper as producer. The remaining 7 percent selected “NA”. These data imply that at least 18 million acres of U.S. agricultural land are operated by a foreign producer.⁷

AFIDA filers are also asked whether the producer on this tract is “the same person as when the tract was acquired”, or whether the producer is “a new person”.⁸ In 2022, foreign purchases led to a new producer on 132 parcels, totaling 417,511 acres. In total historically, 6,212 foreign purchases resulted in a new person becoming the producer, spanning roughly 11 million acres (roughly one-quarter of all foreign-held land and just over one-third of foreign-owned land). However, this number reflects AFIDA filings from 1978 to the present and include some historical acquisitions from years prior to 1978 law enactment.

Data on foreign-owned parcels where there is both a new producer and that producer is the owner can be combined to calculate a rough estimate of the number of producers who have been replaced due to foreign investment.⁹ In 2022, AFIDA data suggest that producers were replaced on 101 parcels. Since reporting began, producers were replaced on approximately 3,248 parcels spanning almost 8 million acres. Figure 11 shows the number of parcels where the previous producer was replaced by a foreign owner by the year the parcel was acquired.

These are rough estimates for several reasons and likely provide a maximum. We do not have information about the previous producer except in cases where they are the current producer and it is possible that the previous producer was also foreign, implying no displacement. The previous producer could have been replaced with a hired foreign manager rather than a foreign owner. Cases where the previous producer was also foreign might artificially inflate the estimate; ignoring the case of incoming foreign management could slightly deflate it. In addition, the land may have been purchased

⁵ This includes both whole and partial ownership, though the results do not meaningfully change if we only include whole ownership.

⁶ Of the 29.6 foreign-owned acres, 27.7 million acres were wholly owned, and 1.9 million acres were partially owned. Total foreign holdings also include other types of interest such as purchase contracts, life estates, trust beneficiaries, and an “other” category, comprised primarily of long-term leases. This “other” category comprised roughly one-third of all foreign holdings, with the other three interest types comprising a combined 1 percent.

⁷ While AFIDA is a mandatory reporting requirement it does not contain any information on the legal status of filers.

⁸ Filers could also answer “NA”, which we assume captures cases where there was no previous producer.

⁹ Assuming previous producer was a U.S. producer, then the combination of the owner being foreign, the producer being the owner, and the producer being a new person implies that a U.S. producer was replaced with a foreign producer.

from an owner-operator who is exiting due to retirement, for example, which would be a special case of displacement.

Differential Impacts of Foreign-Owned and Foreign-Leased U.S. Agricultural Land

Roughly 30 million acres of U.S. foreign-held agricultural land is owned. AFIDA also requires foreign investors to report their holdings in the case of trusts, life estates, purchases contracts, and long-term leases of 10 or more years. Specifically, filers are required to report whether they have either a full or partial ownership interest in the land, a life estate, a trust beneficiary, a purchase contract, or “other” interest (which includes long-term leases). Foreign leases of agricultural land typically result in the dual use of such lands (such as a wind turbine located on a farm) and provide domestic owner-operators with an additional stream of income without significantly impacting the existing agricultural situation (or doing so minimally).

While data gathered from filings does not explicitly reveal how many acres of foreign-held U.S. agricultural land is being used for renewable energy development purposes, we are able to estimate renewable presence based on the name of the company reporting to USDA under AFIDA. We categorized all companies containing either “wind”, “solar”, or “renewable” in their names. Of the roughly 44 million acres of foreign-held land reported for 2022, roughly 25 percent (10.6 million acres) included the term “wind”, 3 percent (1.3 million acres) contained “solar” and just under 1 percent (less than a third of a million acres) had “renewable” in their name, with 28 percent (12 million acres) containing one or more of the three terms.

Note, as indicated above, that the reporting to AFIDA of renewable energy leaseholds does not necessarily result in future installation of wind turbines or solar panels as project installation may not occur due to either internal or external constraints. Likewise, if and when installation does occur, the actual footprint of the energy project is likely much smaller than the full parcel size that filers typically report.

Of the wind/solar/renewable filers for 2021, 99.7 percent of the acres containing at least one of the three terms selected “other” rather than one of the specific ownership structures, likely representing long-term leases rather than ownership. The share of foreign-held agricultural land in the “other” category—of which long-term leaseholds is a major component—has been increasing dramatically over time and now represents roughly one-third of all foreign holdings (up from just under one-fifth in 2012; figure 12).

Foreign-leased agricultural land may have a different economic impact than foreign-owned agricultural land. In addition to the income provided by lease and royalty payments, wind power projects contribute to higher tax revenue for states and local communities which can provide additional fundings to, for example, public schools (see Castleberry and Green, 2017). Likewise, economic theory would predict that this additional stream of income can also increase land values and thus increase the wealth of the farmland’s domestic owner (Deaton and Lawley, 2022). Such leases also presumably lead to increased renewable energy production that can help meet national climate policy goals.

Conclusion

Given that in 2022 there were roughly 2 million farms¹⁰ according to the USDA and over 1 billion acres of privately-owned agricultural land in the U.S., the loss of roughly 800,000 acres of U.S. agricultural land to non-agricultural uses represents a decrease of less than one-tenth of 1 percent over

¹⁰ Not including timber operations.

more than half a century. Similarly, less than two-tenths of 1 percent of farms saw the previous producer replaced with a foreign producer as the result of a foreign purchase. More data is needed before we can better understand and draw further conclusions on the broader impacts of foreign investment in U.S. agricultural land on family farms and rural communities.

Report 1

U.S. Agricultural Landholdings of Foreign Investors

By State as of December 31, 2022

State	Total Land Area of State (Acres) 1/	Privately Held Agricultural Land (Acres) 2/	Foreign Held Agricultural Land (Acres)	Proportion of Foreign Held to Privately Held Agricultural Land (Percent)
Texas	167,188,480	158,207,997	5,435,906	3.4
Utah	52,588,800	12,825,413	119,822	0.9
Vermont	5,898,880	4,257,917	81,069	1.9
Virginia	25,273,600	18,789,439	274,264	1.5
Washington	42,531,840	22,106,131	1,717,990	7.8
West Virginia	15,384,320	12,685,671	288,840	2.3
Wisconsin	34,661,120	23,935,501	584,437	2.4
Wyoming	62,139,520	29,774,001	429,177	1.4
TOTAL	2,262,572,800	1,270,604,522	43,418,141	3.4

Note: Total privately held agricultural land estimate updated

The estimate of foreign holdings as a share of the total privately held agricultural land has increased from 3.1 percent as of December 31, 2021 to 3.4 percent as of December 31, 2022. This share has increased from the last estimate due to an increase in the amount of foreign held lands (the numerator and the focus of this report) and a decrease in the total amount of privately held agricultural land (the denominator and detailed below).

Privately held agricultural land, as defined for AFIDA purposes, consists of cropland, pastureland, other agricultural land (such as farmsteads and farm roads), and forestland. The updated estimate is 1.271 billion acres, down from the prior estimate of 1.290 billion acres. The breakout by major category is 396.4 million acres of cropland, 400.7 million acres of pastureland, 29.9 million acres of other agricultural land, and 443.5 million acres of forestland. These estimates reflect the latest available data from the 2017 Census of Agriculture and the USDA Forest Service's 2017 Forest Resources Assessment Report.

AFIDA defines agricultural land as land in the United States currently used for, or, if currently idle, land last used within the past five years, for farming, ranching, forestry, or timber production, except land not exceeding ten acres in the aggregate if the annual gross receipts from the sale of the farm, ranch, forestry, or timber products produced thereon do not exceed \$1,000.

Note that the inclusion of all forestland makes the AFIDA definition of agricultural land broader than that used by USDA's National Agricultural Statistics Service (NASS), which only includes limited forestland in its "land in farms" number. The NASS estimate of land in farms is 893.4 million acres, which is much lower than the total farmland estimate of 1.271 billion acres from the combined Census of Agriculture and Forest Resources Assessment number used for AFIDA.

US/998 - No Foreign Investor Listed	59	194	481,792	728,465
US/999 - No Predominant Country Code	70	141	291,194	430,511
Subtotal	2,755	8,793	11,567,255	18,238,744
Total All Landholdings	10,851	45,301	44,327,081	79,931,017

1/ If only a foreign country is listed, the row represents holdings by individual foreign investors or foreign entities not created in the U.S. If "U.S./foreign country" is listed, the row represents the interests of U.S. corporations with foreign shareholders. To arrive at the total holdings for the foreign country, the two entries must be summed. For example, total holdings by Australian investors are 201,136 plus 23,195, or 224,331 in total.

2/ Value is the actual purchase price or the estimated value at the time of acquisition.

**Report 5 Foreign Landholdings of U.S. Agricultural and NonAgricultural Land

**Report 5 Foreign Landholdings of U.S. Agricultural and NonAgricultural Land
by Country of Foreign Investor and by U.S. Region as of December 31, 2022**

Country of Foreign Investor 1/	South 2/		West 2/		Northeast 2/		Midwest 2/	
	Parcels	Acres	Parcels	Acres	Parcels	Acres	Parcels	Acres
Subtotal	4,447	4,779,883	2,061	4,609,653	784	868,312	1,501	1,309,406
Total All Landholdings	17,301	19,325,865	7,006	11,059,897	3,562	5,063,342	17,432	8,877,977

1/ If only a foreign country is listed, the row represents holdings by individual foreign investors or foreign entities not created in the U.S. If "U.S./foreign country" is listed, the row represents the interests of U.S. corporations with foreign shareholders. To arrive at the total holdings for the foreign country, the two entries must be summed. For example, total holdings by Australian investors in the South are 117,650 plus 11,639, or 129,289 in total.

2/ South Region: AL, AR, FL, GA, KY, LA, MS, NC, OK, SC, TN, TX, VA, WV, PR; West Region: AK, AZ, CA, CO, HI, ID, MT, NV, NM, OR, UT, WA, WY; Northeast Region: CT, DE, ME, MD, MA, NH, NJ, NY, PA, RI, VT; Midwest Region: IL, IN, IA, KS, MI, MN, MO, NE, ND, OH, SD, WI.

Report 6
Use of U.S. Agricultural and NonAgricultural Landholdings
by Country of Foreign Investor as of December 31, 2022

Country of Foreign Investor 1/	Cropland	Pasture	Forest	Other Agriculture	Other Non Agriculture	Total Acres
Subtotal	1,737,280	2,852,252	5,843,025	820,465	314,233	11,567,255
Total All Landholdings	12,548,790	7,533,774	21,425,518	1,910,058	908,940	44,327,081

1/ If only a foreign country is listed, the row represents holdings by individual foreign investors or foreign entities not created in the U.S. If "U.S./foreign country" is listed, the row represents the interests of U.S. corporations with foreign shareholders. To arrive at the total holdings for the foreign country, the two entries must be summed. For example, total holdings by Australian investors in cropland are 49,151 plus 3,798, or 52,949 in total.

Footnotes:

- 1/Names were valid at the time the penalty was assessed. The entities receiving a penalty may no longer be foreign-owned, may have sold their land, or may have had a name change. In some cases, the name is abbreviated to reflect multiple subsidiary companies that use a similar root name.
- 2/The AFIDA statute allows penalties up to but "not [to] exceed 25 percent of the fair market value of the land". In the early 1980s, the penalty formula was reduced downward to allow for significant penalty reductions. This has resulted in penalties, on average, being less than 1 percent of fair market value of the land.
- 3/A NULL or an empty "PAID DATE" means the paid date is unknown. Penalties are typically paid within 1-2 months of the foreign filer's (or their representative's) receipt of the penalty letter. Entries stating "cancelled" largely reflect two situations: 1) after more information was received, the company was found to not be in a penalty situation; and 2) the initial penalty was cancelled and re-issued under a different name or for other reasons.
- 4/AFIDA filings are tracked based on the primary country associated with the foreign filing. Currently, AFIDA is a paper-based system. Therefore, there is no practical way of identifying other foreign countries that have an interest in the land going back in time. If the primary foreign country is missing, it is likely no longer in our database. This typically occurs because the land was sold, the entity is no longer foreign, the company name has changed, the person is deceased, the foreign company no longer exists, or the company listed may be associated with multiple subsidiary companies in different locations. "999 - NO PREDOMINANT COUNTRY CODE" is listed when there are multiple countries with an interest in the land and no one company has a dominant share.
- 5/The "PENALTY COUNTIES/STATES" column indicates "Multiple Counties" if there are more than five counties associated with a particular penalty.

Notes:

Between 2015 and 2018, no penalties were assessed. Program focus was on the annual report and processing filings, which have increased significantly since 2015. Many of the 2023 penalties are associated with late filings in 2022; not all 2022 penalties have yet been assessed.
