I'd like you there but this is a preliminary meeting to introductions into Greek money. If you'd rather sleep in no problem- I think he will connect us to the top 10 wealthiest Greeks in the world - who by the way as a community think my Dad is a candidate for sainthood for his position on Cyprus. You not being there is easily explained by weather.

Subject: Business Opp

Boss,

I just talked to Eric about some opportunities that are getting close to be ready in the next week

1. Thank to your connection with Gary E, he offered Manuel to be part of a development bank based on Haiti, together with Soros, American Express and the Clinton-Bush fund itself. Manuel would like RosemontSeneca to

be part of that too, if you agree. He is following up with Gary and get more details about next steps.

2. In the last months we have been working with Manuel Estrella in preparing a potential new IT/software company for the DR. Presidente Leonel Fernandez has been pushing some business people to start software companies, as he wants the DR to export more software, and not only textiles. With that objective, the President is going to India in the next days, bringing Manuel and some other business leaders. Manuel will be contacting and meeting with some IT companies, with the idea of partnering with them to enter the Latin American market.

3. Manuel would like RosemontSeneca to be part of that new company, if that's interesting for you. I am attaching a briefing I prepared based on some reports about India-LatinAmerican commerce and investments, and a list of companies from India. Some are already present in the region, like Tata and Infosys. Manuel will send you an email with this idea asking if you would like to be part of it.

4. Italy. For the trip to Italy, I am also arranging 4/5 meetings with Italian companies interested in doing business outside the country. The Institute that invited you is helping with that.

5. I am working in getting the meetings in Buenos Aires with Pegasus and Quilmes guys. Both agreed to meet, we are just working in logistics.

6. FOR DEVON. Devon, you got me all excited about all these Chinese tycoons that you met during your trip there, that were looking forward to invest in Latin America, but you never sent the memo following up with that...The President mentioned yesterday that we should Out Innovate, Out Educate, and Out work everybody else (its my new slogan...trying to impose that in my future wife too...), 3 very essential American qualities that we latinos followed since we arrived to this land of opportunity...please you, as the Wasp in our group, make us proud of that too...with all due respect...

Thank you, Gabriel
